

Company Overview

Intellinet Systems was set up in the year 2003 with the objective of providing flexible, high quality and cost effective software solutions and services to its customers. By enabling qualitative approach with core competency of software engineering the company provides world-class software services to its customers in the automotive and manufacturing segments.

Through strong relationships, innovation and integrated delivery capabilities, **Intellinet Systems** is engaged in driving long-term cost reductions, performance improvements and creating new ways of working tailored to user requirements.

The company has been earnestly involved in designing and development of cutting edge solution for automobile industry. Company's flagship product Intelli Catalogue is a result of thorough research and analysis of the key end user requirements. It addresses the very basic but most critical issue of creation, distribution, and management of part catalogue in an electronic format. Implemented successfully at India's biggest car company, the Intelli Catalogue is poised to take a giant leap forward in providing a value added Illustrated EPC with added features and functionalities for complete end to end solution. The upcoming Intelli Catalogue Product Suite aims to improve the efficiency, consistency and profitability of maintenance, repair and overhaul (MRO) operations and aftermarket sales and service organizations in automobile sector.

Lineage

Intellinet Systems is a Unit of group company **Gupta Metal Sheets Private Limited**, located at Rewari, Haryana, India. Gupta Metal is involved in manufacturing non-ferrous rolled semis, copper and copper alloy sheets, strips and foils since 1989 having one of India's most modern plants equipped with automated, hi-tech machines. The group has diversified business interests in the field of Real Estate and Mining, represented by companies namely M/s **B. M. Metal & Estates (P) Ltd** and **Integrated Alloys (P) Ltd**.

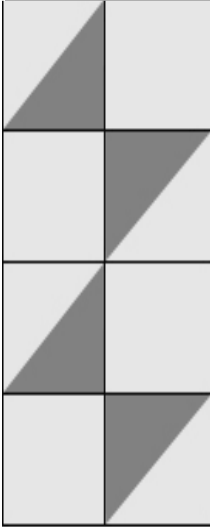

Vision

"To be a leading IT Company in providing cutting edge, world-class software solutions and services for global business needs in Automobile, Manufacturing, Engineering, and other chosen areas".

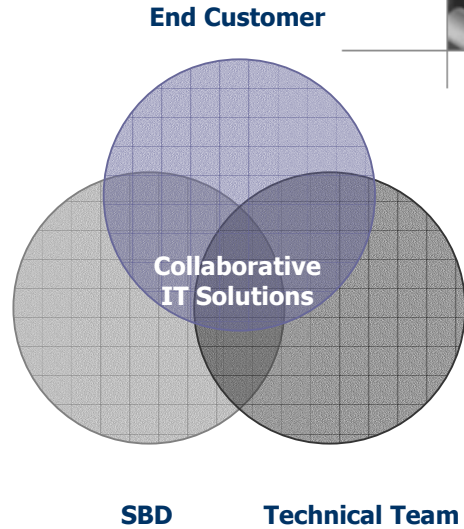

Center of Excellence

Intellinet Systems has been able to successfully establish a Center of Excellence (CoE) during the last few years to streamline and guide the development activities. The CoE is the force behind the focused and dedicated approach towards product conceptualization and development for a vast emerging and demanding customer segment. A typical CoE established in strategic alliance between the Customer, Strategic Business Development, and the Technical Teams of **Intellinet Systems**, the CoE is able to formulate and execute work packages in less delivery time at the same time maintaining high product quality standards.

Infrastructure

Intellinet Systems is housed in 2 floors with a combined area of 6000 sq.ft. The company has a well-defined network, and Internet connectivity. The Firewall is implemented to eliminate unauthorized access from the Internet and the outside world. The Infrastructure policies and strategies are aimed at ensuring smooth and uninterrupted development environment. The Infrastructure elements of the company include:

- o Exclusive furnished space with access controls and other infrastructure
- o Backup Power, Air Conditioning, Water, UPS, etc
- o Hardware, Software, Networking, Printers, Scanners

Quality Policy

The Quality Process Model at **Intellinet Systems** has evolved over a period of time since Company's inception. It encompasses not only the software engineering processes but also all other business processes. These have been seamlessly integrated to deliver greater value to company's customers.

The Quality Process Model has been structured in a way so as to enable smooth incorporation of customer-specific process requirements. The Quality Model emphasizes on defect prevention rather than defect correction to ensure defect free solutions.

Intellinet's Quality Processes are dynamic and are continually reviewed and aligned with ever-changing business and technology environment. The processes support a variety of software development lifecycle models.

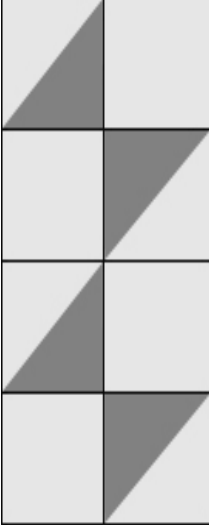

Skills Repository

The biggest strength of **Intellinet Systems** lies in its highly qualified and experienced Human Capital. The committed human resource of the company is a mix of Business Analysts, Project Managers, and Technocrats, having practical, hands on exposure to the following Cutting Edge Technology Domains:
